PROFESSIONAL SUMMARY

Data Analyst with hands-on experience since December 2025 across freelance client work, independent projects, and business analytics systems. Skilled in **Python, SQL, Power BI, DAX, and Excel** for data cleaning, modeling, visualization, and turning data into actionable business insights on datasets of **500,000+ rows**. I also **build apps and websites** (web apps, PWAs, dashboards, and mobile apps), so I can design and ship any new data product or business tool end to end, quickly and efficiently. Experienced with **PostgreSQL/Supabase** schemas, row-level security, RPC functions, REST APIs, and Git/Vercel deployment. Growing toward **Data Engineering** (ETL, data warehousing, cloud) alongside a B.Sc. in Computer Science & AI.

CORE STRENGTHS: Python · SQL (T-SQL, MySQL, PostgreSQL) · Power BI & DAX · Pandas · Next.js / React / TypeScript · Supabase · Dashboards & KPIs

EXPERIENCE

Freelance Data Analyst & Systems Developer | Self-Employed, Cairo, Egypt (Remote)
December 2025 – Present (paid client projects since March 2026)

- Delivered data analysis and BI projects end to end: raw data preparation, Python/Pandas cleaning and feature engineering, SQL analysis, and interactive Power BI dashboards on datasets of **500,000+ rows**.
- Translated findings into KPIs, trends, segmentation, and business-oriented insights for decision support.
- Designed and deployed a **clinic management system** for a physiotherapy clinic with **10 physicians**, replacing fully paper-based patient and appointment records; in pilot use by clinic management and reception.
- Designed and implemented PostgreSQL/Supabase data layers (**22 tables, 16 RPC functions**, row-level security, multi-role access) connecting frontend, backend, and data layers.
- Gathered requirements directly from non-technical business owners and turned them into data models, dashboards, and deployed systems used in daily operations.

SELECTED PROJECTS

Salla Contact Center Intelligence Dashboard

Reverse-engineered a Power BI (.pbix) data model, validated its integrity, corrected faulty measure logic, and rebuilt it as a standalone interactive web dashboard covering **89 days, 16 agents, 1.74M offered calls**. Found that a healthy **91.1% service level** hid **14 days below the 90% target**, traced to forecasting rather than agent performance.
Stack: Power BI, DAX, Python, pandas, JavaScript, Apache ECharts | GitHub

InsightHub: Multi-Branch Sales Intelligence Platform

Sales analytics platform built from real branch data (Cairo, Alexandria, Mansoura) with role-scoped access, KPI dashboards, trend and branch-comparison views, and PDF/Excel export.
Stack: Next.js, TypeScript, Recharts | Live | GitHub

Yousef Academy: Education & Quran PWA

Production PWA serving **~200 users** organically before any marketing spend, backed by Supabase/PostgreSQL (**22 tables, 16 RPCs**), multi-role authentication, admin controls, offline functionality, and real-time features.
Stack: JavaScript, Supabase, PostgreSQL, RLS, RPC, PWA

GlowCare: E-Commerce Business System

E-commerce system with an order-management workflow, Google Sheets integration, Telegram notifications, and backend middleware, replacing manual order tracking.
Stack: React, TypeScript, Vite, Google Apps Script, Telegram Bot API, Vercel

End-to-End Data Analytics Projects

Python cleaning, SQL analysis, KPI definition, data modeling, and Power BI dashboards across US e-commerce sales, global insulin resistance (**188K patients**), technology layoffs (**12,000 records**), Reels engagement, and a retail sales analytics pipeline.
Stack: Python, Pandas, SQL, Power BI, DAX | GitHub

Python CRM & Employee Management System

OOP-based CRM and employee management system with role-based access, automated data-cleaning workflows, a CSV storage layer, and a business analytics engine.

Stack: Python, OOP, Data Cleaning, Business Analytics | GitHub

TECHNICAL SKILLS

Data Analysis & BI: Python, Pandas, NumPy, SQL, Power BI, DAX, Advanced Excel, Statistics, Data Visualization, KPI Analysis

Databases & Data: MySQL, Microsoft SQL Server, PostgreSQL/Supabase (RLS, RPC), Database Design, Data Modeling, Data Cleaning, ETL Concepts

Apps & Web Development: JavaScript, TypeScript, React, Next.js, PWA, REST APIs, Role-Based Authentication, Git, GitHub, Vercel, n8n Automation

Cloud & Methods: Cloud Computing Fundamentals, Exploratory Data Analysis (EDA), Feature Engineering, Business Analysis, Problem Solving

Languages: Arabic (Native), English (Professional Working Proficiency)

CERTIFICATIONS & TRAINING

- **IBM (Coursera):** Introduction to Data Engineering, Sep 2026
- **Kaggle:** Advanced SQL, Oct 2026; Intro to SQL, Oct 2026
- **Mazen Analytics:** AI Analytics Engineer Diploma (Statistics, Business Fundamentals, AI Basics, n8n for Data Analysis), Sep 2026
- **Huawei ICT Academy:** HCIA-Cloud Computing V5.5 (course completion), Oct 2026; Overview of AI, Sep 2026
- **In progress:** McKinsey Forward; Data Engineering program (Data Pill)

EDUCATION

Faculty of Computers and Artificial Intelligence (FCAI), Cairo University

B.Sc. in Computer Science & Artificial Intelligence | 2025 – 2029 (Expected)
